

Ecofont Sans

An environmentally friendly sans serif typeface by Ecofont®

ABOUT THE TYPEFACE

Ecofont Sans is the result of the awardwinning Ecofont technique that saves ink and toner. The tiny holes in the letters are not seen by the human eye at the average size of printed letters. The holes are not meant to be shown on screen, but for the purpose of this document we made an exception.

Tests with Ecofont show savings of 28% on ink.
